Allowable Subject Matter

Claims 1-8 and 11 as presented in the amendment dated 02/09/2009 and in the Examiner's Amendment above are allowed over the prior art of record.

device comprising at least two engagement means, each of the two engagement means at least partially housed in abutment with a shoulder of a recess defined within an inner surface of the needle retraction device in opposition to the retraction bias prior to the release of the needle holder from the housing.

The closest prior art of record is US 6,186,960 to Tripp et al., US 5,000,736 to Kaufold et al., US 6,572,565 to Daley et al., and US 5,352,203 to Vallenlunga et al., all of which teach various elements of the device, but all fail to teach or disclose at least two engagement means at least partially housed in abutment with a shoulder of a recess defined within an interior surface of the needle retraction device in opposition to the retraction bias prior to the release of the needle holder from the housing

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
